

2018 ANNUAL REPORT

ACTION TODAY SO FUTURE GENERATIONS CAN ENJOY OCEAN ACTIVITIES

www.cleanoceanaccess.org

Clean Ocean Access became a non-profit five years ago with a mission: *Action today so future generations can enjoy ocean activities.* What began in 2006 remains core in our three programs: Clean (eliminating marine debris), Ocean (improving coastal water quality) and Access (protecting and preserving shoreline access). We've collaborated with thousands of dedicated people and dozens of organizations who care about the ocean and the environment of Aquidneck Island. Together, we are creating a model for environmental sustainability, so that your investment and our collective hard work will foster environmentally responsible behaviors and healthy living.

In **2018**, our commitment to serve all of Aquidneck Island led to opportunities to advance environmental stewardship with neighboring communities, and now Rhode Island has **TEN** municipal ordinances to promote durable reusable materials through the elimination of single-use plastic bags. Through the power of art and working with our local schools, we continued to raise awareness of plastic pollution and water quality issues and demonstrated our commitment to educate and empower the next generation of environmental leaders through 65 education and outreach events. Our relationship with the sailing community positioned the 2018 Volvo Ocean Race stopover as a near zero-waste event by minimizing waste and single-use plastics, monitoring energy consumption of the Race Village, conserving water, and protecting the waterways and local environment. As a result of this effort, the team received the prestigious **Environmental Merit Award** from the Environmental Protection Agency for outstanding efforts in preserving the New England environment.

Our citizen science model, a founding element since our grassroots inception in 2006, remains essential to our programs with **thousands** of volunteers contributing to a broader understanding of our environment and answering critical scientific questions dependent on our data. Our beaches are cleaner; watershed health issues are being addressed; and, public rights-of-way are being protected.

In **2019** and into the future, we will bring together people and communities to create healthy soils and healthy seas to restore, protect and improve ocean health. Finding the right balance of environmental consciousness and fiscal responsibility is challenging, but with persistence, patience, courage, and grace we are thrilled to lead an amazing team, together with the entire community to further the Clean Ocean Access model for environmental sustainability. We intend to remain an **informed leader** for the conservation of natural resources and will do so by being an organization that listens, cares, and builds partnerships with our community.

Like many organizations, we have been very fortunate to have you, our donors and supporters. As you read this report, you'll see what your investments in our work have achieved thus far, and where it is taking us in the future.

With deep gratitude,

Monica DeAngelis
President, Board of Directors

monica.deangelis@cleanoceanaccess.org

Dave McLaughlin
Executive Director

dave.mclaughlin@cleanoceanaccess.org

From left to right: Garrett Russ (Development Coordinator), Jessica Frascotti (Program Coordinator), Sabrina Pereira (Research Assistant), Max Kraimer (Marine Debris Specialist), Gloria Kostadinova (Communications & Development Manager), Dave McLaughlin (Executive Director), and Eva Touhey (Program Manager).

2018 WAS OUR FIFTH YEAR AS A 501(C)3. Thank you to all the individuals, businesses, foundations, in-kind supporters, local municipalities, federal agencies, and state agencies for recognizing the value we bring to the community for environmental protection and conservation of natural resources. In 2018, we focused on and successfully achieved, sustainable growth of our mission-based work, preservation of our cash balance, and positioned our next steps for long-term fiscal solvency.

Our cash summary illustrates that grants do remain our largest revenue source, some provided critical support for our core programs and operations, while others poised us to lead new initiatives. This enabled us to deepen our capabilities, broaden our partnerships in the community, and intensify the high-impact high-value outcomes of our mission.

2018 FINANCIAL CASH SUMMARY

- FUNDRAISING

AS WE HEAD INTO 2019, the board and staff are working to create a five-year plan to ensure our core programs are fully supported with a diversified revenue stream and a renewed focus on increasing annual community support. To continue to provide you with information throughout the year and highlight our work, we will be hosting major events that not only provide excellent opportunities for participation, but also a setting to increase community financial support and business sponsorship. These events include our 3rd Annual World Oceans Day fundraiser, 6th Annual Swim to Skim across Newport Harbor, and our 2nd Annual Paddle for Access.

A healthy environment and thriving economy are possible, and we look forward to making this happen together. Thank you for believing in our mission, being part of the effort, and continuing to support our efforts as we take action today so future generations can enjoy ocean activities.

Clean Ocean Access Financial statements are reviewed monthly, and our IRS Form 990 are available on our website and upon request.

2018 BOARD OF DIRECTORS

Monica DeAngelis, *President*

Ian Estaphan Owen, *Treasurer*

Annie Becker, *Secretary*

Dave McLaughlin, *Executive Director*

Jon Burr, *Director*

Kara DiCamillo, *Director*

Barbara Frost, *Director*

It's surprising how much marine debris and litter ends up the shoreline, and how much of an impact a couple of hours of work can make on a beach. We loved getting outside this weekend and seeing the change our efforts made.

MARY KATE CORCORAN, NAVY SUPPLY CORPS SCHOOL, NEWPORT, RI

ELIMINATE MARINE DEBRIS

2018 ACCOMPLISHMENTS

In 2018, monthly shoreline cleanups continued, and a significant impact was made with the expansion of programs, partnerships, advocacy, and strategic initiatives. Monthly cleanups occurred at Sachuest Point where small teams from the community performed regular cleanups of the shoreline and watershed. Businesses, including Amica Mutual Insurance, KVH Industries, and Towerstream also performed cleanups to advance our mission. The marina trash skimmer program expanded with the installation of two units in Baltimore, Maryland. In support of zero-waste sustainability events, we assisted Sail Newport at the Volvo Ocean Race and Broadway Merchants at the Broadway Street Fair. We continued advocacy efforts to promote the use of durable reusable materials in our everyday lives and facilitated passage of plastic bag ordinances in Portsmouth, South Kingstown, and North Kingstown.

MARINA TRASH SKIMMERS

LOOKING AHEAD TO 2019

In 2019, steady sustainable growth of the 2018 accomplishments will continue advance our best-practice solutions. We will embark on the multi-year effort, "Healthy Soils, Healthy Seas Rhode Island," to improve ocean health and eliminate marine debris by inspiring environmentally-responsible behavior on land, with an initial focus on businesses and residential composting. We will install marina trash skimmers in Providence, Fall River, and New Bedford. To ensure that this work continues, we will use this final year of grant funding to transition to a sponsorship initiative that sustains our efforts through the installation of new trash skimmers at marinas and harbors across southern New England. As a lead educational organization and Task Force member in the Governor's Tackling Plastics Executive Order, we will collaborate on all efforts, specifically focusing on statewide K-12 education and the Woodsy Owl campaign targeting elimination of marine debris and litter.

Collecting water samples allowed me the opportunity to slow down and take in my surroundings, noticing changes in the environment from week to week. It was a great way to start my day, and I was often greeted with bright and peaceful mornings. Collecting water quality data plays a small, but important role in preserving and protecting the beauty of these moments for everyone.

PAIGE MYATT, WORCESTER, MA

IMPROVE COASTAL WATER QUALITY

2018 ACCOMPLISHMENTS

In 2018, we maintained our citizen science year-round, weekly water quality monitoring efforts in partnership with the City of Newport, Town of Middletown, and Rhode Island Department of Health. We concluded the “Stormwater Pathogens Find It & Fix It” project* with an analysis of sources of pathogens, proposed remediation plans, and improvements for conveyance systems. Based on this information, we initiated a new project* to develop models that will be used to improve the protection of public health and reduce unnecessary beach closures. As a member of the Green Infrastructure Coalition, we developed a residential green infrastructure plan, hosted a rain barrel giveaway with the Aquidneck Land Trust, and advanced the Island Waters Project with the Aquidneck Island Planning Commission and project partners.

LOOKING AHEAD TO 2019

In 2019, we plan to strengthen our citizen science efforts by introducing bacterial source tracking in partnership with the U.S. Environmental Protection Agency. We also plan to complete our new modeling project to help beach managers across the Narragansett Bay watershed improve the protection of public health and reduce unnecessary beach closures. In the watershed, we will complete the residential green infrastructure project, and actively support regional stormwater partnerships. We will also initiate community awareness and political momentum to require organic soil amendment (compost) in residential and municipal projects because it: increases water retention capacity, improves infiltration, reduces runoff, enhances vegetative growth, increases pollutant-binding properties, and improves the quality of the source water that ultimately becomes our drinking water.

*This project work was funded by an agreement (CE00A0004) awarded by the Environmental Protection Agency to the New England Interstate Water Pollution Control Commission on behalf of the Narragansett Bay Estuary Program.

The ocean has given me more than I could ever give back. A time has come when coordinated efforts are necessary to counter negative impacts of modern living against our oceans. I volunteer for COA so generations to come will have clean waves to ride.

ERIC VIENNE, NEWPORT, RI

PROTECT AND PRESERVE SHORELINE ACCESS

2018 ACCOMPLISHMENTS

In 2018, we maintained year-round, monthly public rights-of-way monitoring in partnership with island municipalities and the Coastal Resources Management Council. These citizen science monitoring efforts led to several key initiatives: The City of Newport and Cliff Walk Commission eliminated stormwater erosion issues at Seaview Avenue, and raised awareness of obstruction issues at fishing areas around Ocean Drive. In the Town of Middletown, stewardship efforts at Kingfisher Avenue resulted in improved right-of-way access. In partnership with the Easton's Point Association we initiated efforts to eliminate obstructions and improve overall accessibility. In the Town of Portsmouth, we joined the ad hoc committee for shoreline access improvements and increased monitoring of several rights-of-way, particularly those with vegetation as an obstruction.

SITE SURVEYS

identifying issues & resolutions

LOOKING AHEAD TO 2019

In 2019, we plan to increase the impact of our citizen science efforts by establishing the actual and potential value of each right-of-way. We also plan to initiate a dialogue with local municipalities about fair and equitable parking at public access points. In partnership with the Town of Middletown and Town of Portsmouth, we will begin to adopt the remaining 20 rights-of-way. In partnership with City of Newport, Town of Portsmouth, and Coastal Resources Management Council, we will work to establish and adopt the legal rights-of-way at Marine Avenue in Newport, and Corys Lane and Power Street in Portsmouth. We will document and create plans to establish legal rights-of-way at historic fishing locations. We will continue year-round efforts to be engaged and informed in all rights-of-way efforts, including the Cliff Walk Commission, Restoration Advisory Board, Harbor Walk Commission, and Friends of the Waterfront.

Working with the COA team was an honor. They put their hearts into everything they do, and their efforts have such a positive impact on our environment and community. I look forward to future collaborations with COA and making more positive impacts with our environmental initiatives!

DONNA KELLY, PELL ELEMENTARY SCHOOL, NEWPORT, RI

ENVIRONMENTAL STEWARDSHIP

2018 ACCOMPLISHMENTS

In 2018, we achieved greater educational outreach impact than ever before and increased our investment in environmental leadership with 17 internships. During the Volvo Ocean Race One Ocean Exploration Zone, we used the Power of Art process to engage students in local and global environmental issues by inspiring sustainable behavior and environmental stewardship. We activated the Blue Access for All initiative to inspire youth to develop a connection with the shoreline and to educate them about the importance of a healthy ocean combined with personal healthy living. We continued our third year of Camp GREAT at the Boys & Girls Clubs as part of the Hasbro Summer Learning Initiative. We mentored the Matunuck Girl Scouts on their efforts to eliminate plastics bags in South Kingstown. We created an interactive environmental art exhibit at the Seamen's Church Institute Discovery Deck and engaged students in ecosystem discussion at the newportFILM screening of *The Serengeti Rules*.

LOOKING AHEAD TO 2019

In 2019, we will continue to increase partnerships with schools, community groups, and businesses to promote greater environmental and economic stewardship. We will upgrade and expand our education programming to include the biological, chemical and physical processes of composting. We will diversify our audience to further disseminate our message by assisting with zero-waste sustainability events. We will increase corporate education events for businesses looking to engage in community service and further their corporate social responsibility. We will advance our environmental education through the intersection of art and science with interested organizations with shared values. Our intention is to have a greater presence in the community and inspire environmental stewardship and behavior change in all residents and visitors of Aquidneck Island.

VOLUNTEER EFFORT is the lifeblood of our organization; solutions for environmental issues start by connecting people with nature and inspiring actionable small steps to improve the quality of life. We would like to acknowledge and give our heartfelt thanks to the volunteers and organizations who with diligence and dedication made the choice to make our core programs possible in 2018. If your name is missing, don't worry, Mother Nature is keeping the master list...

The Harbormaster Office really enjoys being part of the trash skimmer program. As our staff empties the skimmers, it is eye-opening to see the amount of trash removed from the harbor as well as the different types of items. The program is a daily reminder that we must change our behavior to improve the health of Newport Harbor as well as the Narragansett Bay and beyond..

**SARA MARIANI, NEWPORT HARBOR MASTER OFFICE,

Clean Ocean Access extends immense appreciation to these individuals, businesses, and organizations that provided financial support (monetary and in-kind gifts) in 2018. These contributions provide the funding to execute our core programs which, along with our numerous volunteers, advance our mission.
